STANNINGLEY PUDSEY LEEDS LS28 6BN

Pipework Fabrication and Erection for the Gas, Petro-Chemical, Water Board and Power Generating Industries
General Fabrications and Machining
Site Welding
Civil Engineering
Plant Removal and Installation

ENVIRONMENTAL POLICY STATEMENT

This Environmental Policy applies to all operations conducted by Stanningley Engineering Ltd (SEL), across all locations and work activities. Compliance with this policy is mandatory for all SEL employees.

SEL acknowledges that its operations may have both direct and indirect impacts on the environment. As such, we are committed, so far as is reasonably practicable, to protecting and, where possible, enhancing the environment.

We will achieve this by:

- Implementing and maintaining effective environmental management practices,
- Adopting industry best practices where feasible, and
- Ensuring environmental considerations are embedded in the planning and delivery of all projects.

Where viable, SEL will adopt greener alternatives in its methods, materials, and equipment, promoting sustainability and continual improvement in environmental performance.

In all of our activities we will aim to:

- Ensure full compliance with all applicable legislation, regulations, and industry codes of practice.
- Use resources efficiently to support a sustainable approach throughout the asset life cycle.
- Adopt the principles of reduce, reuse, and recycle wherever practical.
- Identify opportunities early to minimise environmental impact and implement effective control measures.
- Prevent pollution to air, land, and water through proactive management and good housekeeping.
- Monitor and reduce water and energy consumption across all operations.
- Engage suppliers to minimise packaging and prioritise recyclable or reusable materials.
- Manage waste responsibly by adhering to the waste hierarchy.
- Identify and control all environmental hazards and risks associated with activities.
- Conduct routine audits and inspections to verify the effectiveness of SEL's environmental policies and procedures.
- Promote sustainable purchasing practices and encourage subcontractors to adopt the same.
- Verify that all subcontractors have suitable environmental controls in place before commencing site work.
- Provide regular training and increase environmental awareness among employees to embed sustainability into daily practices.

SEL is committed to ensuring that all operations are carried out in full compliance with applicable UK and EU environmental legislation, the requirements of ISO 14001, and recognised best practices.

This Environmental Policy will be formally communicated to all SEL employees upon issue and made readily accessible to clients, suppliers, contractors, and other interested parties.

The policy will be reviewed at least annually or sooner if legislative changes occur or following any significant environmental incident, to ensure its continued relevance and effectiveness.

Signed

Mark Robinson
Operations Director
